OBJECTIVE

Dynamic Software Engineer with 6 years of experience in full-stack development, specializing in building scalable, user-centric applications. Proven track record of leading cross-functional teams to deliver high-impact projects. Expert in modern technology stacks and committed to solving complex problems through innovative technical solutions.

SKILLS

- **Programming Languages:** Python, JavaScript
- **Frontend Frameworks:** ReactJS, AngularJS
- **Backend Frameworks:** Django, Node.js, Loopback, Express.js, Flask, FastApi, NestJs
- **Mobile Technologies:** React Native, Flutter
- **Tools:** Git, Linux Commands
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Cloud:** AWS

EXPERIENCE

Software Engineer – IoMarket Software Services (Aug 2024 – Present)

- Architected a scalable Micro-Frontend ecosystem using Module Federation and Vite to decouple Admin and User applications, significantly reducing code redundancy through a shared component library.
- Engineered a secure authentication layer by integrating OIDC (Authentik) with Node.js, implementing granular multi-tenant access controls.
- Optimized and restructured an existing middleware B2B application backend and frontend with new business logic for invoice and order handling and transfer.
- Directed a 5-member team in developing an archive application featuring advanced search capabilities and high-performance file handling.
- **Tech Stack:** React, NestJS, AWS, PostgreSQL

Software Engineer – Innovation Incubator Advisory (Dec 2019 – Aug 2024)

1. Gogo Car (Automotive Dealership Solutions) – www.gogocar.com

- Streamlined dealership onboarding processes, enabling seamless business data integration.
 - Implemented dealership rules for vehicle discounts.
 - Introduced "Quick Buy" for instant callbacks.
 - Created dealership setting controls and plan-based feature packaging.
 - Developed customer clustering algorithms to drive targeted email marketing and improve engagement.
- Tech Stack:** Angular, React, Loopback, Express, Python, AWS, MySQL

2. Trellis DataConductor (Document Management System) – [Link](#)

- Architected database schemas and high-performance CRUD APIs for multi-user document management.
- Integrated SSO login from client app.
- Implemented Google & AWS storage/authentication integration.

- Developed file explorer-style navigation API.
Tech Stack: React, Django, PostgreSQL, Google Cloud, AWS

3. StyleAssists – www.styleassists.ai

- Created wardrobe search & filter functionality.
- Integrated OpenAI API and PostgreSQL searchable fields.
- Developed comment section for user engagement.

Tech Stack: Flutter, AWS Cloud Functions

Technical Operations (Sep 2019 – Nov 2019)

- Built automation workflows using in-house RPA for US healthcare billing software.

Open Source Project – Student Community Chat Bot

Contributed profanity filter feature to Discord for GTech Mulearn student community.

PROJECTS

- **Archive Application** – Advanced search & file handling platform.
 - **Gogo Car** – End-to-end automotive dealership management.
 - **Trellis DataConductor** – Document evaluation & correction system.
 - **StyleAssists** – AI-powered personal styling platform.
-

EDUCATION

- **B.Tech – Computer Science & Engineering**, APJ Kerala Technological University (2019)
 - **Higher Secondary (+2)**, IHRD THSS – 70% (2015)
 - **10th Grade**, Kendriya Vidyalaya – 7.6 CGPA (2013)
-

LANGUAGES

English | Hindi | Malayalam

INTERESTS

Cycling | Reading | Trekking

ACHIEVEMENTS & AWARDS

- **KSEB-NSS Energy Conservation Campaign:** Completed a 700 km cycling expedition from Kasargod to Trivandrum to advocate for sustainable energy practices.
Openschooling.org: Spearheaded a volunteer initiative providing free online tuition and resources during COVID-19, significantly improving educational outcomes for students in need.
